

JE Series

(Jump Eccentric)

Eccentric disc pumps

Application areas

Respecting shear sensitive products

- Food industry**
Yoghurts and creams transfer, chocolate and chocolate mousse, doughs, syrups, etc.
- Oil industry**
Oils, fuel, diesel , etc.
- Chemical industry**
Solvents transfer, polymers, acids, etc.
- Industrial applications**
Oils, paints, varnishes, glues, etc.

Operation principle

A shaft drives a piston inside a cylinder. The eccentric movement creates two pumping chambers allowing the transfer of the fluid from suction to discharge port.

Characteristics

		Size 1 - DN50			Size 2 - DN65			Size 3 - DN80			Size 4 - DN100			Size 5 - DN125			Size 6 - DN150

Materials

	JEc «Ductile iron»	JEs «316L Stainless steel»	JEk «Stainless cast iron»
Piston	Ductile iron	Jumplnox (option Bronze, etc.)	Stainless cast iron (Option Bronze, etc.)
Cylinder	Ductile iron	316L Stainless steel	316L Stainless steel
Body / Front cover / Foot / Bypass	Ductile iron, Steel	316L Stainless steel	Stainless cast iron
Bearings	Carbon (option bronze, ductile iron, PEEK,...)		
Seals	FKM, PTFE (option FEP/FKM, EPDM...)		
Screws	Steel	Stainless steel	Steel

Options

- Fitting flanges ISO PN16 or PN20, barbed, Clamp, SMS, MACON, RJT, CAM-Lock, DIN, threaded...
- Heating jacket.
- With or without bypass.
- Mechanical seal Jump or other brands.

Illustrations

Very low shear rate

Self-priming

Reversibility

Dry run capabilities

Strong suction and
compression power

Reduced maintenance
time thanks to innovative
disassembly system of the
seal from the front without
uncoupling the gear motor
and piping

Mechanical seal DIN 24 960
(EN 12 756)
